PROJECTS

Scalable FinTech Infrastructure: Global Accounting & Compliance Dashboard- [Link](#)

- **Regulatory-to-UX Translation:** Translated a 26-page regulatory BRD into an intuitive compliance dashboard, simplifying complex cross-border tax workflows (EU DAC7, Irish VAT, US 1099-K) and marketplace commission reporting for global users.
- **UX-System Alignment:** Designed user flows and interface states aligned with backend webhook triggers (Stripe), visualizing system architecture with Mermaid.js to ensure seamless interaction between the transaction ledger and automated invoice generation.
- **Data Transparency & Trust:** Created a modular financial dashboard with clear financial states, immutable audit logs, and real-time VIES API validation, improving data transparency, compliance confidence, and onboarding efficiency for creators.

ITAC Operations & Client Portal | UX Case Study - [Link](#)

- Designed the **UX architecture for a centralized client management portal** used by staff, students, and external clients.
- Conducted **stakeholder interviews, user journey mapping, and usability testing** to define product requirements.
- Developed **user flows, information architecture, wireframes, and interactive prototypes using Figma**.

Event Creator Dashboard – UX Case Study - [Link](#)

- Redesigned the **event creation workflow** to reduce friction in onboarding and talent booking processes.
- Introduced a **6-step event creation wizard** and centralized dashboard improving user navigation and task completion.
- Conducted **heuristic evaluation, UX audits, and stakeholder workshops** to validate product improvements.
